

Gabriel Dias Mazieri
SOFTWARE ENGINEER

gabrieldias7200@gmail.com / [Github](#) / [Linkedin](#)

I'm Gabriel, an aspiring engineer with nearly 1.5 years of industry experience, dedicated to honing my expertise in distributed systems and computer networks. I have a passion for staying updated on the latest tech trends, regularly immersing myself in the world of Hacker News and Lobsters. What sets me apart is not just my knowledge, but my hands-on approach; I thrive on implementing the innovative ideas I encounter, primarily using Go as my programming tool of choice. I'm excited to bring my enthusiasm and practical skills to a dynamic team ready to push the boundaries of technology.
